

Lambano Coffee

PROJECT
ASSESSMENT
REPORT

2021
2023

Warm welcome to Bududa, Lambano coffee Project Community Alpha.

*Lambano together with its partners;
connected by humanity and banners without borders
donated 2 pulping machines & one motorized spray pump,
to the community of Bududa-Butiliku Joint coffee farmers'
association.*

Lambano through Patrick Noder (connected by humanity) received a 1000 USD grant from the multi-regional summit 2022 which we used to acquire the fertilizers.

On 11th June 2022, Lambano coffee Project Team visited Bududa and donated 17 bags of fertilizer.

On 18th March 2023, the Lambano team visited Bududa to carry out a field survey and assessment on the impact of the previous donations to the community.

We visited the demonstration farm and we found that 1 acre had been planted with healthy seedlings coming up and old trees rejuvenated with manure bearing healthy green leaves and berries

We compared other trees outside the demonstration farm that had no manure and realized that they were dry without leaves and not bearing berries.

We interviewed a direct beneficiary of the pulping machines who testified that her revenue has increased from 1000ugx to 10,000ugx per kg sold because she can now sell pulped coffee as compared to red berries.

A close-up photograph of a person's hands pruning a coffee tree branch. The person is wearing a blue, white, and red striped long-sleeved shirt. The branch is laden with green coffee cherries. The background is a blurred green field of coffee trees.

We also observed that coffee trees in the gardens of the targeted farmers were generally healthier due to the frequent spraying attributed to the availability of the motorized spray pump.

This motorized spray pump is able to cover much more ground in a shorter period.

The community thanked the Lambano group together with its partners for the tremendous improvement in their livelihoods due to the donations received so far.

However, there is still a lot more that is required to be able to achieve our objective.
